MARKS: 150

MARKING PRINCIPLES:

- Unless otherwise stated in the marking guidelines, penalties for foreign items are applied only if the candidate is not losing marks elsewhere in the question for that item (no penalty for misplaced item). No double penalty applied.
- Penalties for placement or poor presentation (e.g. details) are applied only if the candidate is earning marks on the figures for that item.
- Unless otherwise stated, give full marks for correct answer. If answer is incorrect, mark workings.
- If a pre-adjustment figure is shown as a final figure, allocate the part-mark as a working mark for that figure (not the method mark for the answer). Note: figures stipulated in the marking guidelines as components of workings are marked together; these do not carry the method mark for parts thereof.
- Unless otherwise indicated, the positive or negative effect of any figure must be considered to award the mark. If no + or – sign or bracket is provided, assume that the figure is positive.
- Where indicated, part-marks may be awarded to differentiate between differing qualities of answers from candidates.
- If candidates provide more than the required number of responses, inspect all responses to give benefit to the candidate. Penalties may be applied for foreign entries if candidates earn full marks on a question (max -2 per Q).
- These marking guidelines are not for public distribution; as certain items might imply incorrect treatment. The adjustments made are due to nuances in certain questions.
- Where penalties are applied, the marks for that section of the question cannot be a final negative.
- Where method marks are awarded for operation, marker must inspect reasonableness of the answer.
- Operation means 'check operation'. 'One part correct' means operation and one part correct. Note: check operation must be +, -, x, ÷ as per candidate's calculation (if valid) or per marking guideline.
- In calculations, do not award marks for workings if numerator & denominator are swapped – this also applies to ratios.
- In awarding method marks, ensure that candidates do not get full marks for any item that is incorrect at least in part. Indicate with a ☒.
- Be aware of candidates who provide valid alternatives beyond the marking guideline. Note that one comment could contain different aspects.
- Codes: f = foreign item; p = placement/presentation.

These marking guidelines consist of 11 pages.

1.1.3 Explain TWO strategies that the business can use to address the problem of missing cash. award part marks for incomplete / partial answers

Any TWO strategies ✓✓ ✓✓

Be alert to other valid alternative responses. Do not accept 'instal cameras'.

- Receiving and banking of cash should be done by different people / divide or delegate or rotate duties to prevent mismanagement of cash that can lead to missing money or theft. Division of duties is an incomplete answer (one mark).
- Request SMS notifications from the bank / check bank statements (mini statements on App) regularly – ensure correct amounts deposited.
- Outsource the transportation of cash to security companies (large amounts).
- Accompany the person in charge of depositing cash / escorted by security guard.
- Encourage customers to pay online (EFTs) / strive towards cashless or minimal cash handling.
- Do deposits regularly, at different times, using different routes for security purposes / train employees on security or emergency responses.
- Alarm systems or GPS tracking on vehicles used to transport cash.
- Background checks on staff involved with cash – reliable, trustworthy.

2.2.2

Identify and explain TWO cost items (with figures) that may have contributed to the increase in the cost of production per unit. Provide a reason in each case. Note that the current inflation rate is 7%.

Do not accept DMC, SDC and AC as major points.

	COST (with figures) Costs ✓ ✓ trend ✓ ✓	REASON Explanation ✓ ✓ Accept if cost item or figures are provided in this column
Point 1	<u>Direct labour cost</u> / unit increased (from R6,70) to R11,20 / by R4,50 / by 67,2%.	Poor supervision Excessive overtime / linked to load shedding or other disruptions / needed to meet targets Inflationary increases in wages (not linked to production). Poor or lack of effective training. Poor recruitment policy. Lack of motivation – no incentives or rewards for effort.
Point 2	<u>Factory overhead cost</u> per unit increased (from R11,64) to R14,20 / by R2,56 / by 22%.	Diseconomies of scale / drop in production while FOHC remains constant / economies of scale not being achieved. Poor management / supervision of production process – drop in production. Do not accept increases in specific expenses such as rent or electricity (total FOHC was constant over the two years).

4.3.2 Explain to the bookkeeper why his method is incorrect:

Explanation part mark for incomplete or unclear answer
 Explanation and calculation may be provided in the same response.

He has not realised that the asset is almost fully depreciated /
 The R75 000 cannot be correct as this would lead to a negative carrying value /
 A fully depreciated asset must retain a R1 book value for disclosure purposes.

Provide a calculation to support your explanation:

(300 000 – 262 500)
 37 500 – 1 = 37 499 no part marks
