GRADE 12

GEOGRAPHY P1

NOVEMBER 2024

MARKS: 150

TIME: 3 hours

This question paper consists of 17 pages.

Please turn over

Geography/P1 2 DBE/November 2024 NSC Confidential

INSTRUCTIONS AND INFORMATION

1. This question paper consists of TWO sections.

SECTION A

QUESTION 1: CLIMATE AND WEATHER (60)

QUESTION 2: GEOMORPHOLOGY (60)

SECTION B

QUESTION 3: GEOGRAPHICAL SKILLS AND TECHNIQUES (30)

- 2. Answer ALL THREE questions.
- 3. ALL diagrams are included in the QUESTION PAPER.
- 4. Leave a line between the subsections of questions answered.
- 5. Start EACH question at the top of a NEW page.
- 6. Number the answers correctly according to the numbering system used in this question paper.
- 7. Do NOT write in the margins of the ANSWER BOOK.
- 8. Draw fully labelled diagrams when instructed to do so.
- Answer in FULL SENTENCES, except when you have to state, name, identify or list.
- 10. Units of measurement MUST be indicated in your final answer, e.g. 1 020 hPa, 14 °C and 45 m.
- 11. You may use a non-programmable calculator.
- 12. You may use a magnifying glass.
- 13. Write neatly and legibly.

SPECIFIC INSTRUCTIONS AND INFORMATION FOR SECTION B

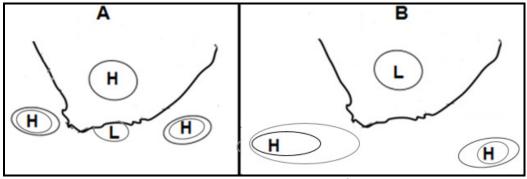

- 14. A 1:50 000 topographical map 2829DB LADYSMITH and a 1:10 000 orthophoto map 2829 DB 6 LADYSMITH are provided.
- 15. The area demarcated in RED/BLACK on the topographical map represents the area covered by the orthophoto map.
- 16. Show ALL calculations. Marks will be allocated for steps in calculations.
- 17. You must hand in the topographical and orthophoto map to the invigilator at the end of this examination.

 SA EXAM PAPERS

SECTION A: CLIMATE AND WEATHER AND GEOMORPHOLOGY

QUESTION 1: CLIMATE AND WEATHER

1.1 Refer to sketches **A** and **B** below. Various options are provided as possible answers to the following questions based on the influence of anticyclones in South Africa. Choose the answer and write only the letter (A–D) next to the question numbers (1.1.1 to 1.1.8) in the ANSWER BOOK, e.g. 1.1.9 D.

[Source: Examiner's own sketch]

- 1.1.1 Sketch **A** shows typical ... conditions.
 - A summer
 - B spring
 - C winter
 - D autumn
- 1.1.2 The low-pressure system in sketch **B** forms due to ... over the land.
 - A low evaporation
 - B intense heating
 - C cold dense air
 - D heavy rainfall
- 1.1.3 ... is the concept used to describe the elongation of the isobars associated with the South Atlantic anticyclone in sketch ${\bf B}$.
 - A Backing
 - B Divergence
 - C Ridging
 - D Convergence
- 1.1.4 The anticyclones in sketch **A** and **B** change their positions seasonally because of the ...
 - A rotation of the Earth.
 - B frictional drag.
 - C shifting of the ITCZ.
 - D Coriolis force.

SA EXAM PAPERS

Geography/P1 4 DBE/November 2024 NSC Confidential

- 1.1.5 The South Indian anticyclone in sketch **B** is likely to feed more moisture over the east coast in comparison with sketch **A** because it ...
 - A is a blocking high.
 - B has a larger fetch (distance).
 - C diverges dry air.
 - D has a smaller fetch (distance).
- 1.1.6 The low-pressure system in sketch **A** will move in a ... direction.
 - A northerly
 - B westerly
 - C easterly
 - D southerly
- 1.1.7 Berg winds are most likely to develop in sketch **A** because of the presence of the ... and ...
 - (i) Kalahari anticyclone
 - (ii) coastal low
 - (iii) South Indian anticyclone
 - (iv) heat low
 - A (i) and (ii)
 - B (ii) and (iii)
 - C (i) and (iv)
 - D (iii) and (iv)
- 1.1.8 The inversion layer that forms over the escarpment in sketch **B** will favour the formation of ... and ...
 - (i) frost
 - (ii) rainfall
 - (iii) fog
 - (iv) hail
 - A (i) and (ii)
 - B (i) and (iii)
 - C (ii) and (iv)
 - D (iii) and (iv)

 (8×1) (8)

Geography/P1 5 DBE/November 2024 NSC Confidential

1.2 Match the descriptions below with sketches **A** and **B**. Write only **A** or **B** next to the question numbers (1.2.1 to 1.2.7) in the ANSWER BOOK, e.g.1.2.8 B.

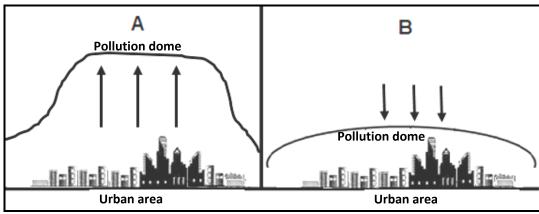

Refer to sketches **A** and **B** on valley climates below to answer QUESTIONS 1.2.1 to 1.2.4.

[Adapted from https://unsplash.com/s/photos/valley]

- 1.2.1 Represents an anabatic wind
- 1.2.2 Cold air forces the warm air to rise which forms an inversion layer
- 1.2.3 Occurs during the day due to insolation
- 1.2.4 Frost forms on the valley floor when the temperature drops below 0 °C

Refer to sketches **A** and **B** on pollution domes below to answer QUESTIONS 1.2.5 to 1.2.7.

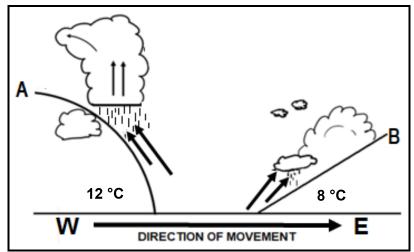

[Source: Examiner's own sketch]

- 1.2.5 Represents a pollution dome at night
- 1.2.6 Pollutants are dispersed
- 1.2.7 Denser concentration of pollutants over the urban area (7 x 1) (7)

Geography/P1 6 DBE/November 2024 NSC Confidential

1.3 Refer to the cross-section below of a mid-latitude cyclone.

[Source: Examiner's own sketch]

- 1.3.1 In which general direction do mid-latitude cyclones move? (1×1) (1)
- 1.3.2 Give a reason for your answer to QUESTION 1.3.1. (1 x 2)
- 1.3.3 How does front $\bf A$ give rise to the formation of cumulonimbus clouds? (2 x 2)
- 1.3.4 In a paragraph of approximately EIGHT lines, explain strategies that can be put in place to manage the negative environmental impact of the heavy rainfall associated with mid-latitude cyclones. (4 x 2) (8)

Geography/P1 7 DBE/November 2024 NSC Confidential

1.4 Refer to the infographic below based on Tropical Cyclone Filipo.

TROPICAL CYCLONE FILIPO

The tropical storm made landfall in Mozambique on 12 March after strengthening off the coast of southeast Africa, bringing strong winds and heavy rain to Mozambique.

On 13 March, Tropical Storm Filipo moved back over the ocean and developed into a tropical cyclone on 14 March.

PATH OF TROPICAL CYCLONE FILIPO INFORMATION ON THE PATH OF TROPICAL CYCLONE FILIPO 10 Mar 12:00 UTC TIME ZIMBABWE DATE WIND 11 Mar 12:00 UTC 10 Mar 12:00 63 km/h UTC 11 Mar 12:00 95 km/h UTC 11 Mar 18:00 UTC 11 Mar 18:00 116 km/h **UTC** 12 Mar 6:00 UTC 06:00 12 Mar 95 km/h SOUTH UTC AFRICA 12 Mar 18:00 74 km/h 12 Mar 18:00 UTC UTC Maputo 13 Mar 06:00 84 km/h 13 Mar 6:00 UTC UTC 13 Mar 18:00 106 km/h UTC 127 km/h 14 Mar 06.00 13 Mar 18:00 UTC UTC MATURE STAGE **INDIAN OCEAN** 4 Mar 6:00 UTC [Source: South African Weather Services]

- 1.4.1 State ONE condition that could have led to the development of Tropical Cyclone Filipo. (1 x 1)
- 1.4.2 Give evidence from the map and table of information that Tropical Cyclone Filipo had strengthened from 10 to 11 March. (2 x 1) (2)
- 1.4.3 Give TWO reasons for the decrease in wind speed from 06:00 to 18:00 on 12 March. (2×2) (4)

Geography/P1 8 DBE/November 2024 NSC Confidential

1.4.4 On 14 March, Tropical Cyclone Filipo reached the mature stage. Draw a labelled cross-section of Tropical Cyclone Filipo in its mature stage. Marks will be awarded for the following:

(a)	Cross-section	(1 x 1) (1)

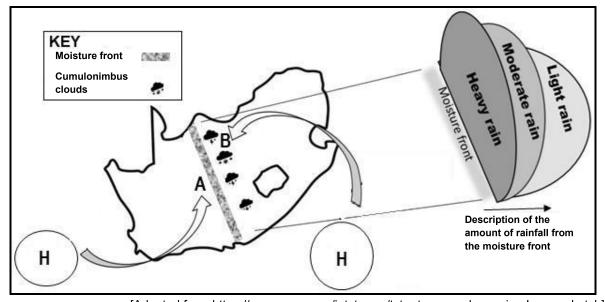

(b) Cloud type
$$(1 \times 1)$$
 (1)

(c) Eye
$$(1 \times 1)$$
 (1)

- 1.4.5 Account for the lack of rainfall and clouds in the eye of the tropical cyclone. (2 x 2) (4)
- 1.5 Refer to the source below based on line thunderstorms.

LINE THUNDERSTORMS OVER SOUTH AFRICA

During summer, thunderstorms can form a line that can extend for hundreds of kilometres. These line thunderstorms can persist for many hours and produce damaging winds and hail, which impacts negatively on the natural environment.

[Adapted from https://www.noaa.gov/jetstream/tstrmtypes and examiner's own sketch]

- 1.5.1 According to the extract, in which season do line thunderstorms commonly occur? (1 x 1) (1)
- 1.5.2 Describe the temperature and moisture content of wind **A** and wind **B** that led to the formation of the line thunderstorm. (2 x 2) (4)
- 1.5.3 Explain why the heaviest rainfall occurs closest to the moisture front, as evident in the source. (2 x 2) (4)
- 1.5.4 Explain the negative physical (natural) impact of line thunderstorms.

 - A meander.
 - B delta.
 - C flood plain.
 - D alluvial fan.
- 2.2.5 The slope at **X** on the inner bank of a meander is also referred to as a/an ... slope.

[Adapted from https://www.google.com/url? sa=www.quora.com%2F]

- A steep
- B undercut
- C concave
- D slip-off
- 2.2.6 A/An ... forms when the meander loop is cut off from the main stream.
 - A delta
 - B rapid
 - C ox-bow lake
 - D flood plain
- 2.2.7 The benefit of natural levees is ... on the flood plain.

[Adapted from https://%3A%2F%2Frossettgeography.weebly.com%2F-levees]

- A increased deposition
- B reduced flooding
- C reduced fertility
- D increased flooding

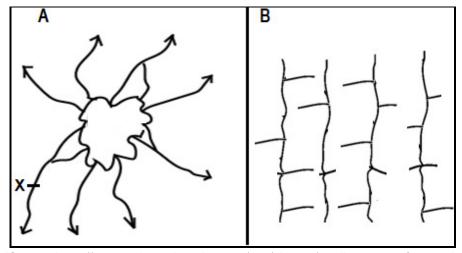

EXAM PAPERS

Geography/P1 12 DBE/November 2024 NSC Confidential

- 2.2.8 Deltas form at the river mouth when the following conditions occur:
 - (i) Shallow sea bed
 - (ii) Steep sea bed
 - (iii) Strong currents
 - (iv) Small tidal range
 - A (i) and (ii)
 - B (ii) and (iii)
 - C (iii) and (iv)
 - D (i) and (iv)

 (8×1) (8)

2.3 Refer to drainage patterns **A** and **B** below.

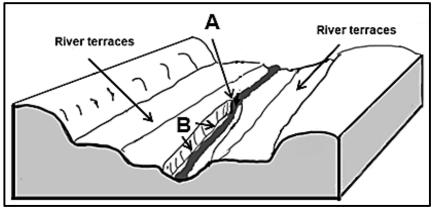

[Source: https://courses.lumenlearning.com/geo/chapter/reading-types-of-stream]

- 2.3.1 Identify drainage pattern \mathbf{A} . (1 x 1)
- 2.3.2 Determine the stream order of \mathbf{X} in drainage pattern \mathbf{A} . (1 x 2)
- 2.3.3 Give a reason for the direction in which streams flow in drainage pattern $\bf A$. (1 x 2)
- 2.3.4 How does the joining of the tributaries to the mainstream differ in drainage patterns $\bf A$ and $\bf B$? (1 x 2)
- 2.3.5 State TWO conditions associated with the underlying rock that contributed to the formation of trellis drainage pattern **B**. (2 x 2) (4)
- 2.3.6 Why are human activities limited in areas where drainage patterns **A** and **B** are found? (2 x 2) (4)

Geography/P1 DBE/November 2024 13 NSC Confidential

2.4 Refer to the sketch below on river rejuvenation.

How do river terraces form?

[Source: Examiner's own sketch]

- 2.4.1 Define the term river rejuvenation. (1×2) (2) 2.4.2 (1) Identify the feature at **A**. (1×1) How does feature **A** indicate that river rejuvenation has taken place? 2.4.3 (2) (1×2) 2.4.4 Describe the change that river rejuvenation has made to the landscape at **B**. (1×2) (2) Refer to the river terraces in the sketch above.
- 2.4.6 Why are some river terraces not suitable for farming? (2×2) (4)

2.4.5

 (2×2)

Geography/P1 DBE/November 2024 NSC Confidential

2.5 Refer to the extract below on catchment and river management.

MANAGEMENT OF CATCHMENT AREAS AND RIVER NETWORKS (SYSTEMS)

River catchments are under severe pressure in some parts of South Africa. The plentiful water they provide has meant that the fertile ground surrounding them is an ideal place for agricultural activities. They are areas of natural beauty and often support both plant and animal species.

Unfortunately, humans have not always recognised the importance of river catchments. When toxins and heavy metals leach into the catchment areas, they can endanger the lives of the flora and fauna. Agricultural run-off can carry chemicals into river catchments, creating an imbalance in nutrient levels and impacts on different species in different ways.

Fortunately, we are now beginning to pay attention to the conservation of these vital natural resources.

[Adapted from https://www.envirotech-online.com/news/water-wastewater/9/breakingnews/what-is-classed-as-a-river-588921

2.5.1	What is river management?	(1 x 2)	(2)
2.5.2	Name ONE human activity in the extract that has a negative on South Africa's catchment areas.	impact (1 x 1)	(1)
2.5.3	How does the human activity (answer to QUESTION negatively impact the health (water quality) of a catchment are		(4)
2.5.4	In a paragraph of approximately EIGHT lines, suggest sust strategies the government can put in place to preserv catchment areas.		(8) [60]

SECTION B

QUESTION 3: GEOGRAPHICAL SKILLS AND TECHNIQUES

GENERAL INFORMATION ON LADYSMITH

Coordinates: 28°33'S; 29°46'E

Ladysmith is a city in the Uthukela District of KwaZulu-Natal. It is situated along the Klip River. The climate is warm and temperate with the highest rainfall recorded in summer. The average annual temperature is 17,3 °C. The average annual precipitation is approximately 1 057 mm. This climate provides ideal conditions for agricultural raw materials.

[Adapted from https://en.wikipedia.org/wiki/LADYSMITH]

The following English terms and their Afrikaans translations are shown on the topographical map:

ENGLISH	<u>AFRIKAANS</u>
Furrow	Voor
Aerodrome	Vliegveld
Klip River	Kliprivier
Sewage works	Rioolwerke
Weir	Studam

Refer to the	ne o	rthophoto map.					
3.1.5	Calculate the area of the demarcated feature 6 in blocks A4/A5 and block B4 . Give the answer in km².						

Use the following information: Length is 3,0 cm.

Formula: Length x Breadth (4×1) (4)

3.1.6 Give a reason why the expansion of the demarcated feature 6 (answer to QUESTION 3.1.5) is limited in a south-easterly direction? (1×1) (1)

3.2 **MAP INTERPRETATION**

Refer to **F** in block **C2** and **G** in block **D4** on the topographical map.

3.2.1 The temperature at **F** in the centre of the town is 2 °C higher (a) than at G. Name the concept that describes this difference.

> (1×1) (1)

Give ONE reason why the high density of buildings at F (b) generally contributes to the higher temperatures. (1×2) (2) Geography/P1 17 DBE/November 2024 NSC Confidential

Refer to blocks **D2** and **D3** on the orthophoto map.

3.2.2 Explain how aspect of slope determined the location of Rose Park at **7** on the orthophoto map. (1 x 2)

Refer to the dam **H** in block **B1** on the topographical map.

3.2.3 The dam wall indicates that the river is flowing in a ... direction.

A south-westerly

B north-easterly

C north-westerly

D south-easterly

 (1×1) (1)

Refer to the weir at \boldsymbol{I} in block $\boldsymbol{A3}$ on the topographical map.

3.2.4 A weir is used to regulate (control) the flow of water in a river. Explain why the construction of the weir was necessary. (1 x 2)

Refer to the section of the Klip River from 8 in block A2 to 9 in block A5 on the orthophoto map.

3.2.5 Identify the fluvial landform/feature. (1 x 1)

3.2.6 Give evidence why this fluvial landform/feature (answer to QUESTION 3.2.5) developed in this area. (1 x 1)

Refer to block **C5** on the orthophoto map.

3.2.7 Why will more erosion take place at **11** than at **10**? (1×2) (2)

3.3 **GEOGRAPHICAL INFORMATION SYSTEMS (GIS)**

3.3.1 The vertical aerial photograph used to make the orthophoto map has a (high/low) resolution. (1×1) (1)

3.3.2 The reference of the topographical map represents (spatial/attribute) data. (1 x 1)

3.3.3 How does this data (answer to QUESTION 3.3.2) assist in identifying feature **J** on the topographical map? (1 x 2) (2)

Refer to 12 in block C2 on the orthophoto map.

3.3.4 Define the term *buffering*. (1×2) (2)

3.3.5 How would buffering at **12** protect the quality of the water in the Klip River? (1 x 2)

TOTAL SECTION B: 30
GRAND TOTAL: 150
